Inspiron 15 (1545) Laptop Review

**Bought in July 2010**

Overall: the laptop is good , it has a great performance and a nice style ..The only disappointing thing is the graphics,When I turned it on for the first time I Shocked,,

Inspiron 15 (1545) Laptop Review

**Great laptop at a great price**

This is the 8th Dell Inspiron 1545 I have purchased. In August 2009, I purchased five of them to outfit a computer lab for the newly-formed computer club in our community. They were so sound and easy to use (and popular with our members) that I purchased one in September 2009 as a birthday gift for my mom. She loves it, and I have had to do no work on it to keep it functioning well for her (a big change from her last computer). Early this summer, I purchased one for the golf pro shop in our community, and the manager is so happy with it that she is planning to buy one for her personal use. About a month ago, I purchased an additional 1545 for our computer lab, as the others were so popular and busy. Several of our club members have, after using the 1545s in the lab, purchased their own 1545. They liked them so well that they didn't even consider anything else. All of these Inspiron 1545s and no problems!

Product Uses: email, computer classes, web surfing, word processing
